

Special Edition
March 23, 1984

On March 8 and 9, the Engineering Society held its annual elections. The number of ballots in the ballot box on Thursday exceeded the total number of signatures on the voters list by 4. The total number of signatures on the voters list on Friday exceeded the number of ballots by two. The Chief Returning Officer has declared the results of the presidential election invalid.

The position of V.P. Activities is now vacant due to the disqualification of Mr. Alegre and the withdrawal of Mr. Dow and Mr. Kasper. Nominations were reopened for this position.

Bill Hollings **President**

Once again, the Engineering Society is calling upon you to vote, and at this time I feel that you should be making some direct comparisons.

So-o-o-o-o...

My experience includes: three years as a class representative; the Acting Shinerama Chairman during 1983; and Blue and Gold Chairman, organizing events such as this year's winning (sic) Homecoming Float, Godiva Week, and a few pubs throughout the year.

As far as next year is concerned, I chaired a meeting about the computing facilities for next year, and I sat on a committee of both staff and students concerned with the future of the incidental fee.

Finally, my ticket and I were concerned enough to go see Dean Wright to straighten out the loss-of-accreditation (sic) myth. If you have any questions about any candidate's performance, please go to the Eng Soc and read some of the complaints and allegations posted there.

Bruce Christie **President**

Once again, engineering students are faced with a presidential election—the most important such election of the past hundred years. The upcoming year is the Engineering Society Centennial (sic) and will require an outgoing, involved president. However, there are many

dilemmas (sic) facing the students in the year ahead; problems which must be attacked by a strong, experienced leader.

In his two years on the Engineering Society executive, Bruce Christie created virtually every new event over the past two years; developing contacts in the faculty, alumni, industry and other student societies which will help him to deal with the issues facing engineers. The accreditation review, incidental fee and Bovey Commission on University Restructuring are three important issues Bruce plans to deal with. Bruce will also work with SAC to ensure that engineers get their money's worth from that organization.

On March 27, 28 elect an experienced, innovative leader; elect Bruce Christie, president.

Luis Alegre **V.P. Activities**

During the last elections, we successfully managed to fill the positions (sic) of V.P. Administration, Treasurer, and Secretary (congratulations to all 3!). However there are still two officers who have to be re-elected (President, and V.P. Activities). You elected me previously to the position of V.P. Activities, the position that I'm running for, and I want to take this opportunity to thank you. Unfortunately, a technicality was used to impede my entry to office. As a consequence, some amendments (sic) had to be made to the rules.

Copies of the complaints and rulings regarding the elections of March 8 and 9 are posted in the Engineering Society office.

An election will be held during the week of March 26 for the positions of President and V.P. Activities. Campaigning will be on Monday March 26. The polls will be open (SF building across from the cafeteria) on Tuesday, March 27 and Wednesday, March 28.

Presented below are the statements prepared by the candidates themselves. The views expressed are not necessarily those of *The Cannon* or the Engineering Society.

But as you can see, my enthusiasm is still unbounded!. (sic) I'd like to see things materialize next year. My prime objectives will be to unite our Faculty, and to make our Centennial (sic) year the best ever!

As V.P. Activities, I will make sure that the chairmen are co-ordinated and that your confidence in our society is restored.

Franco Minatel **V.P. Activities**

As an active member of the Engineering Society Franco Minatel, has been involved with the LGMB, BFC, and general activities around the ENG SOC. He has been class rep for the past two years, with this year being his most active, in organizing mega class events.

IN (sic) the upcoming year he would continue the traditional social events as well as a few more ACADEMIC events, such as the computer show, staged this year, as the people from this faculty tend to lean towards that direction a bit more. Franco is an individualist but has still managed to have a good rapore (sic) WITH (sic) the other members of the Engineering Society and would have no trouble in getting the cooperation of any of the committee members and chairpersons. Over all FRANCO MINATEL is quite compitant (sic) and responsible and would appreciate your vote.

P.S. FRANCO IS NOT WEIRD. YOU'RE JUST TOO NORMAL!!
